An excellent manual for the newbie investor, *Investments: The Answer* discusses five basic but key decisions necessary for fruitful investments. With simple advice that is both easy to follow and efficient, this book shows you how to develop a more profitable portfolio for any investor. Should I invest on my own or seek professional help? How should I assign my investments between stocks, bonds, and cash? What specific types of stock, within all the main categories, should I be sure to include in my portfolio? Should I adopt an administrative method to invest, or follow a passive option? When is a good time to sell and buy stocks? In a world of operators who do not stop talking and believe that they can successfully cheat the system within a market characterized by its instability, this extraordinary book offers all the orientation any new investor needs."
